

Connect International has introduced fact sheets and drawings as part of our community development programs, to assist people in self help groups in rural communities in Africa to become aware and learn how to improve their health, well-being and welfare. The fact sheets cover a wide range of topics: from dental hygiene to child rights, and from gardening to Malaria.

 This is an interactive PDF. Clicking on an underlined link will bring you straight to the specific webpage.

They have been **tested extensively** by beneficiaries, community coaches and staff of our partner organizations in Mozambique, Tanzania, and Zambia. But the fact sheets and drawings can benefit many more poor people. We hope **your organization** will become interested to use the fact sheets and drawings in your projects and programs as well. In that way more poor people can learn in an **interactive and accessible way** how to improve their lives and undertake successful action to do so.

The fact sheets and drawings can be downloaded for free from our website:

<http://www.connectinternational.nl/english/smartmodules/smart-dev/fact-sheets>

Below you can find most of the subjects covered to date with fact sheets. Please contact us if you wish to receive the complete format of one of these fact sheets. We also invite you to keep a regular eye on our website as we produce **new fact sheets regularly**. If you wish to adapt the texts or translate them in a local language please request us for the **fact sheet Word files**.
